HYUNDAI HYM20200SPEX 196cc PETROL LAWN MOWER

Pull-starting a mower isn't hard, but it's not always welcome either. Sore shoulders, cold mornings, or just not wanting the hassle. The Hyundai HYM20200SPEX adds electric start to the capable 20" / 51cm platform. Press a button, the engine fires, and you're mowing. If the battery runs flat, the recoil backup is still there and the battery can be recharged with the charger supplied.
