Introduction

Thank you for purchasing your Hyundai Product

We work very hard to give all of our customers the best possible service. If you have any problems, before leaving negative feedback, please contact us to give us a chance to resolve the issue. We would be delighted if you left us positive feedback! Thank you for purchasing this product.

⚠ Important!

WARNING: READ THE INSTRUCTION BOOKLET THOROUGHLY BEFORE USING THE MACHINE. Keep for future reference and pass it on if the machine is loaned or sold to another user.

This manual has been produced by Hyundai Power Products and should be kept with the product. Please read and understand these instructions before you use your product. Failure to do this may result in personal injury or damage to the product.

The safety precautions and warnings are to ensure your safety and protect you from harm or damage to the product.

The information contained in this manual is accurate at the time of publication. However, Hyundai Power Products reserves the right to make changes to the product without prior notice.

Safety Information

⚠ Understand Your Machine

• **WARNING!** You must read these instructions carefully before operating the machine. Ensure you are familiar with the controls and their proper operation. You must learn how to stop the machine quickly. If you do not follow the warnings and instructions, it may result in fire and/or serious injury. Make sure to save all warnings and instructions for future reference.
• Read this manual and labels affixed to the machine to understand its limitations and potential hazards.
• Be thoroughly familiar with the controls and their proper operation. Know how to stop the machine and disengage the controls quickly.
• If the unit is to be used by someone other than the original purchaser, or is to be loaned, rented, or sold, always provide this manual and any needed safety training before operation. The user is responsible for preventing accidents or injuries that may occur to themselves, to other people, or to property.
• Do not force the machine beyond its limits. Use the correct machine for your application.
• Know how to stop the machine quickly in case of emergency. Understand the use of all controls.
• ALL MAINTENANCE other than that listed in this manual should be carried out by professionally trained and certified personnel.
• When using this machine for the first time, you MUST read through this Instruction Manual and understand the labels affixed to the microwave.

⚠ Personal Safety/Important Safety Information

• Ensure that the main circuit voltage matches the appliance's rating before use.
• If the power cord or appliance is damaged, stop using it immediately and contact the manufacturer, an authorised service agent, or a qualified professional for assistance.
• **WARNING!** Do not let the cord hang over the edge of a table or counter. The microwave may be pulled off, which could cause serious injury, particularly to children, or result in entanglement with the user.
• DO NOT carry the appliance by the power cord.
• Avoid pulling the plug by the cord, as it may damage the plug or cable.
• Switch off the appliance at the wall socket and unplug it when not in use or before cleaning.
• Only use accessory attachments supplied with the product; the use of other accessories is not recommended.
• DO NOT use extension cords with this appliance.
• Close supervision is necessary when children are near or using the appliance.
• Children should not play with the appliance.
• This appliance can be used by children aged 8 years or older, as well as individuals with reduced physical, sensory, or mental capabilities, provided they are supervised or instructed on its safe use and understand the associated risks.
• Cleaning and maintenance should not be performed by children without supervision.

Safety Information

⚠ Personal Safety/Important Safety Information (Continued)

- Carefully read these instructions before using your HYUNDAI appliance.
- Use caution when the appliance is near pets.
- Use this product only for its intended purpose.

⚠ During Use

- **WARNING!** Do not heat liquids or food in sealed containers, as they may explode. Always ensure a small gap is created between any container and its lid to reduce any build-up of pressure.
- DO NOT put metal in the microwave. Metal can cause sparks and increase the risk of arcing and fire.
- NEVER use paper containing metallic decoration. Recycled paper products can contain tiny flecks of metal that can ignite and result in arcing.
- Be cautious when heating beverages, as microwave heating can cause delayed eruptive boiling, which may occur after the container is removed.
- Do not fry food in the microwave. Hot oil can damage the oven and utensils, and may cause burns.
- Eggs in their shell, or whole hard-boiled eggs, should not be heated in the microwave as they can explode even after heating has finished.
- Pierce foods with thick skins (e.g., potatoes, squashes, apples, chestnuts) before cooking to prevent bursting.
- Stir or shake the contents of feeding bottles and baby food jars, and always check the temperature before serving to avoid burns.
- Cooking utensils can become hot due to heat transfer from food. Use pot holders if necessary.
- Ensure that utensils used in the microwave are suitable for microwave use.
- **WARNING!** Only a trained professional should perform any service or repair that requires the removal of protective covers to prevent exposure to microwave energy.
- This product is classified as Group 2, Class B ISM equipment. Group 2 includes all ISM (Industrial, Scientific, Medical) equipment that generates and/or uses radio-frequency energy for material processing. Class B equipment is intended for use in residential environments and those connected to a low-voltage power supply.
- This appliance should not be used by individuals (including children) with reduced physical, sensory, or mental capabilities, or lack of experience, unless supervised by someone responsible for their safety.
- Children should be supervised to ensure they do not play with the appliance.
- The microwave oven is designed for free-standing use only.
- **WARNING!** Do not install the oven over a cook top or other heat-producing appliance, as this may damage the microwave and void the warranty.
- The microwave should not be placed inside a cabinet.
- **WARNING!** The appliance and accessible parts become hot during use.
- **WARNING!** Accessible parts may become hot during operation. Keep young children away.
- During operation, the appliance becomes hot. Take care to avoid touching heating elements inside the oven.
- Surfaces of the microwave may become hot while in use.

Safety Information

⚠ During Use (Continued)

- The appliance should be placed against a wall.
- The appliance should not be used by children or individuals with reduced capabilities unless they are supervised.
- **WARNING!** If the door or door seals are damaged, the microwave must not be operated until it has been repaired by a qualified technician.
- This appliance is not intended to be operated by an external timer or a separate remote-control system.
- DO NOT run the microwave when it is empty. The energy created will damage the microwave's components.
- The microwave oven is for household use only and is not designed for commercial applications.
- Do not remove the distance holder on the back or sides of the microwave, as it ensures proper air circulation by maintaining a minimum distance from the wall.
- Secure the turntable before moving the microwave to prevent damage.
- **CAUTION!** Only specialists should attempt repairs or maintenance involving the removal of protective covers, as this could expose them to microwave radiation. This also applies to replacing the power cord or lighting. In such cases, send the appliance to our dedicated Aftersales team.
- The microwave is intended for heating, cooking and defrosting food only.
- Use oven mitts when handling heated food.
- Be cautious of escaping steam when opening lids or removing foil.
- If smoke is emitted, switch off or unplug the microwave immediately, and keep the door closed to stifle any flames.

⚠ Precautions to Avoid Exposure to Excessive Microwave Energy

- Never attempt to operate the microwave with the door open, as this can lead to harmful exposure to microwave energy. Do not tamper with or bypass the safety interlocks.
- Ensure no objects are placed between the microwave's front face and the door, and prevent dirt or cleaning residue from building up on the sealing surfaces.
- Do not use the microwave if it is damaged. It is essential that the door closes properly and that there is no damage to: a) The door (including any bending), b) Hinges or latches (broken or loose), c) Door seals and sealing surfaces.
- Only qualified service personnel should adjust or repair the microwave.

Safety Information

⚠ Electricity - Earthing Instructions

IMPORTANT: This appliance must be earthed. It is equipped with a standard 3-pin UK plug. The plug must be inserted into a properly installed earthed socket.

Earthing helps reduce the risk of electric shock by providing a safe path for electrical current in the event of a short circuit.

It is recommended to use a dedicated circuit that serves only the microwave oven. Using higher voltage can be dangerous and may cause a fire or other damage to the oven.

WARNING: Improper use of the plug may result in electric shock.

NOTE:

1. If you have any questions regarding earthing or electrical instructions, consult a qualified electrician or service technician.
2. The manufacturer and dealer are not liable for any damage to the oven or personal injury caused by not adhering to the electrical connection instructions.

The wiring in the mains cable follows this colour code:

- Green and Yellow = Earth
- Blue = Neutral
- Brown = Live

⚠ Electrical Safety

DANGER! ELECTRICITY CAN KILL - NEVER WORK ON LIVE/ENERGISED EQUIPMENT.

- Prior to carrying out any maintenance work you MUST identify electrical isolation methods and isolate all electrical supplies
- Prior to use and with all electrical supplies isolated, you MUST check all electrical cables, plugs and connectors for the following;

- Are intact and have no signs of damage, to include but not limited to bare wires, chafing, cuts and loose wiring.
- If there are any signs of damage, the damaged item MUST be taken out of service until the damage has been repaired by an electrically competent person.
- All trailing cables should be routed so as not to cause any kind of trip hazard.
- NEVER work on or near electricity with wet hands, wet clothing and wet gloves.

⚠ Electrical Safety (Continued)

- This appliance is fitted with a 3-pin UK plug (13A BS1363) containing a 13A ASTA approved fuse.
- Should the fuse need to be replaced, please ensure the replacement is a BS1362 fuse of the same rating.
- The appliance plug must match the outlet. Never modify the plug in any way. DO NOT use any adapter plugs with earthed (grounded) appliances. Unmodified plugs and matching outlets will reduce risk of electric shock.
- DO NOT expose this appliance to rain or wet conditions. Water entering an appliance will increase the risk of electric shock. DO NOT abuse the power cord. Never use the cord for carrying, pulling or unplugging the appliance. Keep the cord away from heat, oil and sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- **IMPORTANT:** Make sure that the electric circuit is fused, and that the power, voltage and frequency of the appliance is supported by your mains supply. Also, make sure that your power supply is earthed. Connect your machine to earth. Never open the ON/OFF switch box. However, if it should become necessary to do so, contact a qualified electrician. Ensure that you never touch live contacts, specifically when you plug or unplug your machine. This appliance and its power cord must never get into contact with water.
- Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
- Do not allow any part of the machine to make contact with water while it is in operation. If the appliance becomes wet while turned off, wipe dry before starting.

Safety Information

⚠ Residual Risks

WARNING! This machine produces an electromagnetic field during operation. This field may under some circumstances interfere with active or passive medical implants. To reduce the risk of serious or fatal injury, we recommend persons with medical implants to consult their physician and the medical implant manufacturer before operating this machine.

When operating and maintaining the microwave, please also consider the following:

Hot Surfaces - Ensure you take proper care when handling food and utensils which have been heated in the microwave. Allow resting time for the surface to cool before handling.

Steam - Steam and pressure can build up when heating food and liquids. Ensure ample ventilation has been created to allow pressure to escape.

Microwave Radiation - If the microwave has been damaged, dented or has accumulated dirt within its door seals, the protective mesh can degrade. This can lead to exposure of non-ionizing radiation. Ensure the microwave is properly maintained and periodically check for any signs of damage.

⚠ Radio Interference

NOTE: The operation of the microwave oven may cause interference with radios, televisions, or similar electronic devices. If interference occurs, you can try the following measures to reduce or eliminate it:

- Clean the microwave oven's door and sealing surfaces.
- Reorient the antenna of the affected radio or television.
- Relocate the microwave oven to a different position relative to the receiver.
- Move the microwave oven further away from the receiver.
- Plug the microwave into a different outlet to ensure the microwave and receiver are on separate circuits.

Safety Information

⚠ Intended Use

The HYMW90025DBG is a 900W microwave with 25L of oven capacity from HYUNDAI. The machine is manufactured according to the latest safety requirements. Every precaution is only effective when it is followed exactly.

Intended Use

This appliance is designed to heat, cook, dry and defrost food. ALWAYS cook and defrost food according to the manufacturer's recommended instructions.

This machine is not suitable for environments where the ambient temperature exceeds 32°C.

User Types

This machine is intended for use by consumers, i.e. non-professional operators. The machine is intended for "DIY" and domestic use only.

Improper Use

Any other usage not in keeping with the above-mentioned ones may be hazardous and harm persons and/or damage property.

Safety Information

⚠ Symbols On The Machine

We have provided safety messages in this manual and on the machine. This information alerts you to potential hazards that could hurt you or others. Please read these messages carefully. However, we may not have listed all of the possible hazards, you must also use your own judgement.

Symbol	Description	Symbol	Description
	Disposal. **Do not dispose of with household waste.** **Return to an approved WEEE recycling facility.**		The UKCA (UK Conformity Assessed) marking is a UK product marking that is required for goods being placed on the market in Great Britain (England, Wales and Scotland).
	This product complies with the European directives and an evaluation method of conformity for these directives was done.		To reduce the risk of injury, the user must read and understand owner's manual before using this product.
	Do not expose to rain or use in damp conditions.		The appliance, associated components and packaging should be sorted, taken to the local recycling centre and disposed of in an environmentally safe way.

Unboxing

⚠ **WARNING:** Unboxing and assembling the machine should be done on a flat, surface with enough room. Disposal of the packaging should be done in accordance with the local regulations in force.

⚠ **WARNING:** Some of the packaging material may be harmful to children. Keep out of reach of children.

1. Carefully remove the product from the packaging and examine it for any signs of damage caused during shipping.
2. Lay the contents out and check them. If any part is damaged or missing, you must not use the machine. Contact HYUNDAI HOME APPLIANCES immediately.
3. You must keep the packaging material in case the machine needs to be returned or repaired.
4. Ensure that all supplied accessories are present before use.

We recommend that you fill out the information in the 'Product Record' section. If you need to contact an authorised dealer or customer service, you may need to provide this information.

Before First Use

⚠ **IMPORTANT:** Before using your new microwave for the first time, it is important you read through the entirety of this instruction manual and follow the steps below:

1. Ensure all packing materials are removed from inside the door.

2. **WARNING!** Inspect the oven for any damage, such as a misaligned or bent door, damaged door seals or sealing surfaces, broken or loose hinges and latches, or dents inside the cavity or on the door. If any damage is found, do not use the oven and contact qualified service personnel.

3. Place the microwave on a flat, stable surface that can support both its weight and the heaviest food it may hold.

4. Avoid placing the oven near sources of heat, moisture, high humidity, or combustible materials.

5. To ensure proper operation, allow adequate airflow around the oven. Maintain at least 20 cm of space above, 10 cm at the back, and 5 cm on both sides. Do not block or cover any of the appliance's openings. Do not remove the feet.

6. NEVER cover the microwave's ventilation openings during operation. This could cause the microwave to overheat.

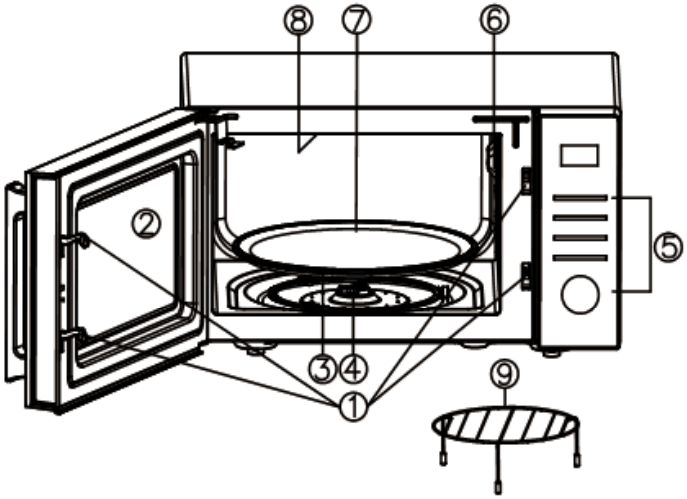

7. Do not operate the oven without the glass tray, roller support, and shaft correctly positioned.

8. Ensure the power cord is intact and does not run under the oven or over hot or sharp surfaces.

9. The power socket should remain easily accessible for quick unplugging in case of an emergency.

10. Do not use the microwave outdoors.

In The Box/Features

1. **Door Safety Lock System**
   This prevents the user from accidentally opening the door during operation.
2. **Oven Window**
3. **Roller Ring**
   This carries the weight of the glass tray and allows it to rotate.
4. **Shaft**
   This transmits power from the motor to turn the glass turntable.
5. **Control Panel**
   This allows the user to select the desired setting to operate the microwave.
6. **Wave Guide**
   This transfers and directs the microwaves to the cooking chamber.
7. **Glass Tray**
   Place your food on this in preparation to be cooked or defrosted.
8. **Grill Heater**
   Use this to brown, toast and crisp foods like pizza, sandwiches and meats.
9. **Metal Rack**
   The metal rack is for Grill cooking ONLY.

Cooking Utensils Guide

⚠ **IMPORTANT:** It is vital that you read and understand the below before operating the microwave for the first time and/or using a cooking utensil which you haven't used before.

⚠ **IMPORTANT:** Failure to comply with the guidelines set below can cause damage to the microwave, as well as putting the user and other persons close to the appliance in unnecessary danger.

Food Contact: ALWAYS ensure that accessories intended for food contact comply with Regulation (EC) 1935/2004.

1. **Avoid Using Metal:** Microwaves cannot penetrate metal. Always use utensils that are specifically labelled as Microwave Safe. Do not use metallic containers for food or beverages during Microwave Cooking unless the manufacturer explicitly specifies the size and shape of metallic containers that are safe for microwave use.

2. **No Metal Utensils:** Avoid using metal utensils or dishes with metallic trims, as microwaves cannot pass through metal and may cause damage or arcing.

3. **Recycled Paper Products:** Do not use recycled paper products when cooking in a microwave, as they may contain small metal fragments that can cause sparks or even start a fire.

4. **Shape of Dishes:** Use round or oval dishes rather than square or oblong ones, as food tends to overcook in the corners of angular dishes.

Cookware	Microwave	Grill	Combination
Heat-Resistant Glass	Yes	Yes	Yes
Non Heat-Resistant Glass	No	No	No
Heat-Resistant Ceramics	Yes	Yes	Yes
Microwave-Safe Plastic Dish	Yes	No	No
Kitchen Paper	Yes	No	No
Metal Tray	No	Yes	No
Metal Rack	No	Yes	No
Aluminium Foil & Foil Containers	No	Yes	No

Heating Guidelines

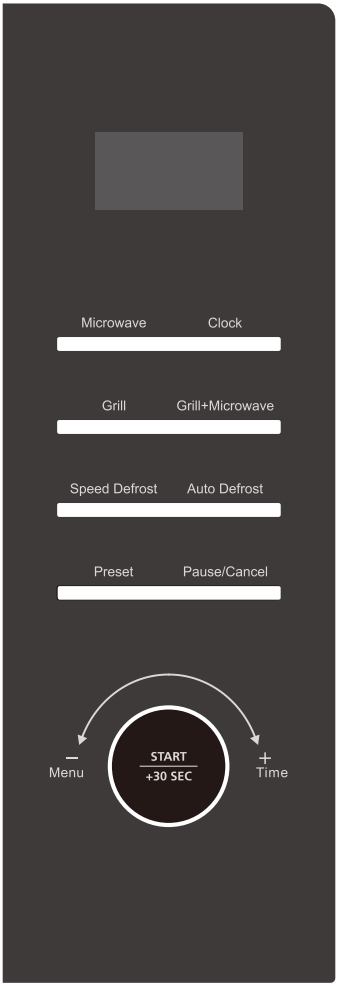

Plastic Containers: Never heat food in sealed plastic containers. Please ensure you create ventilation for the steam to escape.

Baby Bottles: Remove the teat and cap before heating.

Empty Containers: NEVER operate the microwave with empty containers.

Control Panel

⚠ **IMPORTANT:** Please ensure you become familiar with each function on the panel before using the microwave for the first time.

Control Panel Overview

Display Screen
Time, power and indicators are displayed.

Microwave
Press to select microwave power level.

Grill
Press to set grill cooking program.

Grill + Microwave
Press to set microwave and grill combination cooking program

Speed Defrost
Press to defrost food based on time.

Auto Defrost
Press to defrost food based on weight.

Preset
Use to set the microwave to start-up at a later time.

Clock
Press to set clock time.

Pause/Cancel
Press this button once to pause cooking, or twice to cancel the cooking altogether.

Menu/Time (Dial)
Turn the dial to select Auto Cooking Menus.
Turn the dial to set desired cooking time.

Start/+30 Sec (Dial)
Press the dial to start cooking programmes.
Simply press the dial a number of times to set the desired cooking time to cook immediately at full power.

Operation

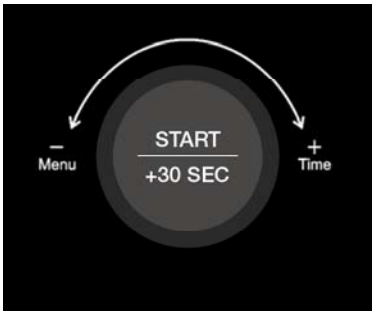

Initial Instructions

- When the oven is first plugged in, a beep will sound, and the display will show "1:01."
- If no operation is performed within 30 seconds during any setting, the system will automatically return to Standby mode.
- During cooking, pressing the **Pause/Cancel** button once will pause the program. To resume, press the **START/+30 SEC.** button. Pressing **Pause/Cancel** twice will cancel the program.
- After cooking is complete, the display will show "End," and a beep will sound every two minutes until a button is pressed or the door is opened.
- While the oven is operating, pressing a valid button will result in a single beep, whereas pressing an invalid button will cause the buzzer to sound twice.

Setting The Clock

NOTE: This microwave features a 12- or 24-hour clock. You can choose your preferred format by pressing the **CLOCK** button while in Standby mode.

1. In Standby mode, press the **CLOCK** button once or twice to select either the 12 or 24 hour clock.
2. Turn the **MENU/TIME** dial to set hour.
3. Press **CLOCK or START/+30 SEC** button once.
4. Turn the **MENU/TIME** dial to set minutes.
5. Press **CLOCK or START/+30 SEC** button to confirm.

NOTE: During cooking, you can view the current time by pressing the **CLOCK** button.

Operation

Microwave Cooking

1. In Standby mode, press the **MICROWAVE** button repeatedly until you reach the desired power level.

   NOTE: The table below details the amount of times you need to press the **MICROWAVE** to reach the desired output.

2. Turn the **MENU/TIME** dial to set the cooking time. The maximum cooking time you can set is 95 minutes.
3. Press the **START/+30 SEC** button to confirm and start cooking.

Overview of Power Levels

Press MICROWAVE button	Power (Display)	Press MICROWAVE button	Power (Display)
Once	100% (P100)	7 times	40% (P-40)
Twice	90% (P-90)	8 times	30% (P-30)
3 times	80% (P-80)	9 times	20% (P-20)
4 times	70% (P-70)	10 times	10% (P-10)
5 times	60% (P-60)	11 times	0% (P-00)
6 times	50% (P-50)		

NOTE: During cooking, you can check the current power level by pressing the **MICROWAVE** button.

To cook at full power, directly turn the **MENU/TIME** dial clockwise to set the cooking time. The time ranges from 10 seconds to 95 minutes. Once you have selected the desired time, press the **START/+30 SEC** button to start cooking.

Express Cooking

Express Cooking allows you to program the microwave to cook food at 100% power level conveniently.

1. In Standby mode, press the **START/+30 SEC** button repeatedly to set the cooking time. Each press of the button increases the time by 30 seconds, up to a maximum of 10 minutes.

2. Once you have set your desired cooking time, the microwave will automatically cook at full power.

Operation

Defrosting Overview

⚠ **IMPORTANT:** When defrosting food with the use of a microwave, please take the following recommendations into consideration before cooking and consuming the food.

- Check the packaging for any defrosting instructions, if available.
- Remove the packaging (unless otherwise specified), as the chemicals can contaminate the food during thawing and may allow bacteria from the thawing liquid to affect the food, particularly with meat.
- Place the food in a microwavable container or dish and cover it. For liquid foods, such as soup, use a deep bowl to prevent spills.
- Select the specific defrost setting for the type of food you are defrosting, where possible.
- Press start and defrost the food in 1-2 minute increments (or longer for larger pieces), checking to ensure it is thawing evenly.
- Once defrosting is complete, remove the food from the microwave and ensure the centre is completely thawed and contains no remaining ice crystals.
- Always verify that your food is thoroughly defrosted before cooking. For further precautions and additional defrosting methods, consider reading our article on how to defrost food safely.
- Clean the microwave after defrosting to prevent cross-contamination.

Speed Defrost

1. In Standby mode, press the **SPEED DEFROST** button once.
2. Turn **MENU/TIME** dial to set the defrosting time. The maximum time you can set is 95 minutes.
3. Press the **START/+30 SEC** button to confirm and start defrosting.

   NOTE: During defrosting, the microwave will signal a beep and pause operation to remind the user to turn the food over. Turn the food over, close the door and press the **START/+30 SEC** button to resume defrosting.

Auto Defrost

The defrosting time and power level are automatically set once the food weight is programmed. The frozen food weight ranges from 100g to 1800g.

1. In Standby mode, press the **AUTO DEFROST** button repeatedly to select the correct food weight.
2. Press the **START/+30 SEC** button to confirm.

NOTE: During defrosting, the microwave will signal a beep and pause operation to remind the user to turn the food over. Turn the food over, close the door and press the **START/+30 SEC** button to resume defrosting.

Operation

Preset Cooking Mode

This function allows you to program the oven to start at a later time.

1. In Standby mode, input a cooking program (except express cooking, auto defrost and speed defrost).
2. Press the **PRESET** button once.
3. Turn the **MENU/TIME** dial to set the hour digit.
4. Press the **PRESET** or **START/+30 SEC** button once.
5. Turn the **MENU/TIME** dial to set the minute digit.
6. Press the **PRESET** or **START/+30 SEC** button to confirm.

NOTE: The microwave will emit an audible beep once the preset time is reached. Once the beep has signalled, the preset cooking program will begin.

When the microwave remains in Preset mode, you can check the preset time by pressing the **PRESET** button once.

You can cancel the preset program by pressing the **PAUSE/CANCEL** button when the preset time is showing.

Using the Grill

Grill cooking is particularly useful for cooking thin slices of meat, steaks, chops, kebabs, sausages and pieces of chicken. It is also suitable for hot sandwiches and au gratin dishes.

1. In Standby mode, press the **GRILL** button once.
2. Turn the **MENU/TIME** dial to set the desired cooking time. The longest time you can set is 95 minutes.
3. Press the **START/+30 SEC** button to start cooking.

Combination Cooking

Combination 1 (Co-1): The grill operates for a longer time than the microwave.
Recommended for: Fish and au gratin dishes.

Combination 2 (Co-2): The microwave operates for a longer time than the grill.
Recommended for: Puddings, omelettes, baked potatoes and poultry.

1. In Standby mode, press the **GRILL+MICROWAVE** button once or twice to select **Co-1** or **Co-2.**
2. Turn the **MENU/TIME** dial to set the cooking time (maximum: 95 minutes).
3. Press the **START/+30 SEC** button to start cooking.

NOTE: During cooking, you can check the selected combination mode by pressing the **GRILL+MICROWAVE** button.

Operation

Auto Cook Mode

NOTE: For the following foods or cooking modes, you do not need to program the cooking power or time. Simply indicate the type of food you wish to cook along with its weight or servings.

1. In standby mode, turn **MENU/TIME** dial anti-clockwise once, the display screen show code "A-01", then continue to turn MENU/TIME dial to select another food code.
2. Press the **START/+30 SEC** button once.
3. Turn **MENU/TIME** dial to select food weight or servings.
4. Press **START/+30 SEC** button to confirm.

Code	Food	Note
A-01	Milk/Coffee (200ml/cup, 1-3 cups)	• For Milk/Coffee and Potato, the display screen will not show the icon 'g'. • For codes A-07 - A-09, the system will pause during cooking to remind you to turn the food over. Once the food has been turned over, close the oven door and press the **START/+30 SEC** button to resume. • The results of the auto cook feature depend on several factors, including the shape and size of the food, your personal preference for how well the food is cooked, and how the food is arranged in the oven. If you find the results are not satisfactory, please adjust the cooking time slightly to improve the outcome.
A-02	Potato (230 ± 10 g/serving, 1-2 Servings)	
A-03	Rice (150 - 600g)	
A-04	Spaghetti (100g, 200g & 300g)	
A-05	Auto Reheat (200 - 800g)	
A-06	Fish (200 - 600g)	
A-07	Grilled Chicken (800g - 1400g)	
A-08	Beef/Mutton (200 - 600g)	
A-09	Skewered Meat (100 - 500g)	

Heating Guidelines

Popcorn: Only cook microwave popcorn according to the manufacturer's instructions.

Liquids: Allow standing time before removing. Liquid will be extremely hot.

WARNING! NEVER heat alcohol! Alcohol can ignite.

Child Lock Function

NOTE: The child lock feature prevents unsupervised use by children.

To activate the child lock:

In standby mode, if there is not any operation within one minute, the oven will auto enter child lock mode and the lock indicator light will turn on. In the lock state, all buttons are disabled.

To deactivate the child lock:

In child lock mode, open or close the oven door once to cancel the program and the lock indicator light will go out.

Button Adhesion Protection

In any mode, if a button on the control panel is held down or stuck for 1 minute, the program will stop immediately, "FAIL" will appear on the display, and the system will beep. If the button remains stuck, the beep will sound every minute, and all buttons will be disabled during this time. After resolving the issue, press the **PAUSE/CANCEL** button to return to Standby mode.

Wave Guide Maintenance

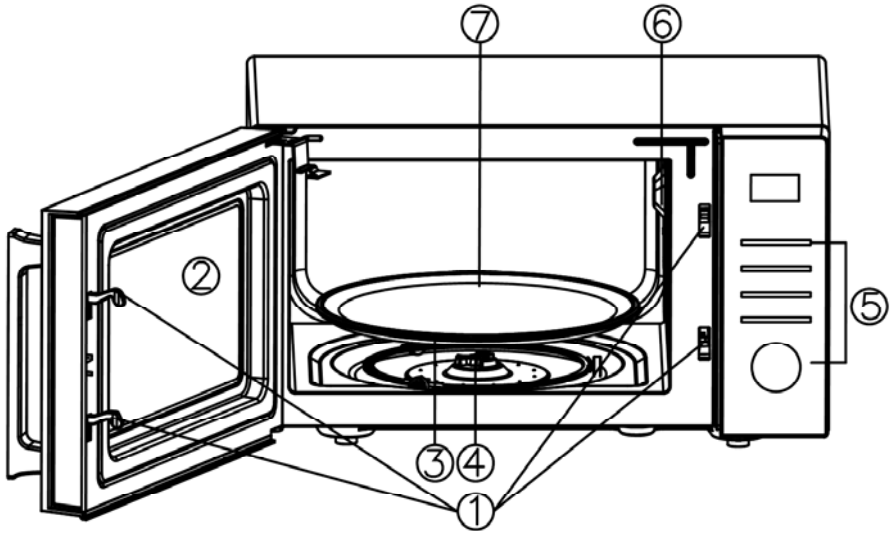

IMPORTANT: Constant use of the microwave can cause the Wave Guide **(labelled '6' in the below diagram)** to deteriorate, like any other component, over time.

As such, it is vital you check the condition of the wave guide periodically. Inspect it for signs of damage, burning or cracking. Damaged wave guides become ineffective and can lead to arcing.

Regularly checking the wave guide will increase the efficiency and extend the service life of the appliance.

For more information, and/or to order a wave guide specific to this microwave, please visit our Power Spares website: power-spares.co.uk.

Further information on Power Spares can be found on Page 26 of this manual.

Maintenance & Care

Auto Clean

This microwave is equipped with an 'Auto Clean' function. This allows you to keep the microwave clean without the need for harsh scrubbing. Please follow the steps below:

1. Prepare a 200ml bowl of water, place it into the microwave and close the door.
2. In Standby mode, turn the **MENU/TIME** dial anti-clockwise twice. The display screen will then show **A-10.**
3. Press **START/+30 SEC** button to start.

NOTE: The clean time lasts for 5 minutes.

Cleaning

- Always turn off the oven and unplug it before cleaning.
- Keep the interior of the oven clean. Wipe up food splatters and spills from the oven walls using a damp cloth. If needed, mild detergents can be used for tougher cleaning. Avoid harsh sprays or cleaners, as they can stain or damage the door surface.
- Clean the exterior of the oven with a damp cloth. Take care not to let water seep into the ventilation openings, as this could damage the internal components.
- Regularly wipe the door, window (inside and out), door seals, and surrounding areas with a damp cloth to remove any spills. Avoid using abrasive cleaners.
- Do not use a steam cleaner on the oven.
- Keep the control panel dry. Clean it with a soft, damp cloth, and ensure the oven door is open during cleaning to prevent accidental operation.
- If steam accumulates inside or around the door, wipe it off with a soft cloth. This can happen under high humidity conditions and is normal.
- Periodically remove the glass tray for cleaning. It can be washed in warm soapy water or placed in a dishwasher.
- Clean the roller ring and oven floor regularly to prevent noise during operation. Wipe the oven floor with mild detergent, and wash the roller ring in soapy water or in a dishwasher. Ensure the roller ring is properly repositioned after cleaning.
- To remove odours, microwave a bowl of water with the juice and peel of one lemon for 5 minutes. Then, wipe the interior thoroughly and dry with a soft cloth.
- If the light bulb burns out, contact customer service for a replacement.
- Regular cleaning is essential. Failure to maintain the oven in a clean condition can cause surface deterioration, reduce the appliance's lifespan, and potentially create a hazardous situation.
- Do not dispose of this appliance in regular household waste. It should be taken to a designated disposal centre provided by local authorities.

Troubleshooting

NOTE: Before requesting service, if the microwave fails to switch on or operate at its intended level, please check the following;

- Ensure the oven is securely plugged in. If not, unplug it, wait 10 seconds, and plug it back in firmly.
- Check if a circuit fuse has blown or if the main circuit breaker has tripped. If both seem to be functioning properly, test the outlet by plugging in another appliance.
- Check to ensure the door is securely closed, engaging the door lock system. If the door is not properly closed, the microwave energy will not flow inside.
- Check to ensure the control panel is programmed correctly and the timer is set.

IMPORTANT: IF NONE OF THE ABOVE STEPS SOLVES THE PROBLEM, CONTACT A QUALIFIED TECHNICIAN. DO NOT TRY TO ADJUST OR REPAIR THE OVEN YOURSELF.

To maintain your machine in peak operating condition, proper maintenance and care are crucial. Some machines have consumable parts that will need replacement to ensure they continue operating at their full potential. PowerSpares provide manufacturer parts for all your machines, ensuring they remain in peak condition.

About Power Spares

Power-Spares has your back if you damage your lawn mower blade, find your spark plugs not sparking, or snap your recoil. Power-Spares operates under the trading name of Genpower Limited.

As part of the Genpower family, Power-Spares offers you the expertise, efficiency, and quality assurance of a large organisation. We leverage the latest warehousing, distribution, customer service, and inventory management technology to ensure you receive your parts as quickly as possible.

With extensive stock-holding of spare parts in our UK warehouses, Power-Spares is ready to assist you promptly when your machine needs repair. We're committed to help you get back up and running as quickly as possible.

Technical Data

Specification

Model	**HYMW90025DBG**
Power Consumption	230-240V~50Hz, 1400W Microwave / 1000W Grill
Output	900W
Operation Frequency	2450MHz
Outer Dimensions (H x W x D)	281 x 483 x 437mm
Oven Capacity Dimensions (H x W x D)	197 x 340 x 363mm
Oven Capacity	25L
Net Weight	13.5kg
Off Mode	<0.8W **NOTE: The max period after which the equipment automatically switches off is 20 minutes.**
